

WE'RE PROUD TO FLY THE STRAW WARS FLAG  
— SAYING NO TO PLASTIC STRAWS

Why? Plastics are extremely detrimental to the environment, as they can't biodegrade, they last indefinitely - breaking down into smaller pieces, feeding into the food chain and potentially ending up on our dinner plates. Not ideal.

Billions of straws are discarded every year, filtering into landfills and littering the oceans. But this can change. The idea is simple—we just won't put a straw in your drink. It's that easy.
